

Dashboard allows users to see at a glance across all processes and process groups, throughout the organization. By designing simple ways to track and view key metrics, Dashboard helps users to navigate important information with efficacy and efficiency.

Business-Wide View

Built with customized persona-based views, Dashboard creates collaboration with multiple users from all parts of the business. Because the tools are designed for multi-persona access, businesses can maintain checks and balances and see revisions with historical change logs.

Zoomed-In View

Dashboard opens to a home screen of users, departments, email templates, subscribed products, and bots. In one screen view, users can see:

- Registered users and invited users
- Roles for specific users
- Activity and alerts for bots
- Payment method
